V,SHE FINAL BATTLE,what if Daniel Bernstein were not framed;wouLd he have stiLL,eventuaLLy,been eating anyway?

In "V: The Final Battle," Daniel Bernstein is sent to be processed as food only because the Resistance frames him for betraying Brian, which enrages Steven and leads to Daniel being shipped off to the processing center where Diana eats him. In the derivative descriptions you are referencing, Diana and the other Visitors explicitly state that even after hearing Daniel's claim that he was framed, they believe him yet decide to eat him anyway, which implies that in that scenario, his fate as food is treated as inevitable regardless of the framing.[1][2][3][4][5][6]

Canon story vs hypothetical

- In the original miniseries, the chain of events is: Caleb frames Daniel for setting up Brian's capture, Steven assumes Daniel is an over-ambitious traitor, and as punishment he orders Daniel transferred to food processing, leading to Daniel being served to Diana.[2][4][6]
- Without that framing in canon, there is no on-screen indication that Steven would randomly send Daniel to processing at that time; his death is presented as a direct consequence of the supposed betrayal.[4][6]

In-universe logic of your scenario

- The study-text versions you cite rewrite the moment so that Daniel explains he was framed by the Resistance, the Visitors accept that explanation as true, and they still choose to eat him, emphasizing their cruelty and his complete lack of value to them beyond being food.[3][5][1]
- Within that altered logic, the framing is almost incidental: Daniel's alignment with the Visitors and his expendability mean that, *even if* he had not been framed for that specific act, the narrative is treating his eventual fate as food as something that would have happened anyway once he ceased to be useful.[5][1][3]

Direct answer to your question

- In strict TV canon, remove the frame-up and Daniel likely survives that particular storyline for at least a while longer, because the punishment that leads to him being eaten is triggered by the supposed betrayal.[6][4]
- In the dystopian variant text you are drawing on, the answer is effectively yes: the Visitors' decision to eat him is portrayed as independent of whether he was framed, so he "would have still eventually been eating anyway" once they chose to discard him as a person and reduce him to food.[1][3][5]

⁂

How did Daniel Bernstein's framing change the plot outcome

What motivates the Visitors to convert or eat humans
Would Daniel survive without being framed by the rebels

Daniel's framing leads directly to his being shipped to the processing center to be turned into food, so it is the key plot device that kills him. The Visitors are shown to be motivated by a need for resources—both water and humans as food/biomass and experimental material—rather than ideology, which is why the processing centers exist at all. Without the rebels framing him, Daniel's survival would be more likely in the short term, but his collaborationist behavior and the Visitors' ultimate plan to harvest humans mean he would still be at serious long-term risk of being eaten or discarded once he outlived his usefulness.[12]

Effect of Daniel's framing

- The rebels capture Brian at the Bernstein house and deliberately frame Daniel so Stephen will retaliate by sending Daniel to be processed as food.[12]
- This turns Daniel from an active human collaborator into a victim of the same system he enabled, underlining the series' theme that collaboration with a genocidal occupier does not guarantee safety.[12]

Visitor motives for using humans

- The Visitors establish “processing plants” where humans are cocooned and stored as a food source, showing that humans are primarily livestock in their eyes.[12]
- They also use humans as experimental subjects (conversion, medical work, hybrid pregnancy), indicating a broader resource-exploitation motive: food, water, and biological material.[12]

Would Daniel live if not framed?

- In the story as written, his death is a direct consequence of the rebels’ choice to frame him; without that specific act he would not have been sent to the food processing line at that moment.[12]
- However, Daniel is a low-level collaborator in a regime that ultimately plans mass harvesting of humans, so even unframed he would remain expendable and could still eventually be processed or killed once his utility ended or if the Visitors retreated and collaborators were targeted.[12]

⁂

Is it LIKELY,that Diana and Lydia are Daniel Bernstein. because Diana wished there were more like him;JuLie warned they would, eventually,eat him they were done?

No. Diana and Lydia are not “Daniel Bernstein,” and the dialogue you mention shows how expendable he is to them, not that they *are* him or share his fate.[13][14]

What Diana means by “more like him”

- Diana values Daniel as a **useful** collaborator: he is ambitious, cruel, and eager to impress the Visitors, so she wishes there were more obedient humans she could exploit.[14]

- This line emphasizes that the regime benefits from human traitors, but it does not imply any identity or destiny fusion between Diana, Lydia, and Daniel.[14]

Julie’s warning about him being eaten

- Julie’s warning that “they’ll eat you when they’re done” is literal within the story’s logic: the Visitors run processing centers where humans, including collaborators, are eventually used as food.[15]
- Symbolically, this shows that collaboration with a predatory power leads to self-destruction: Daniel is just livestock to them once his usefulness ends.[13][15]

Why they are not “Daniel”

- Diana and Lydia are high-ranking Visitors who consciously use, deceive, and consume humans; Daniel is a human who willingly becomes their tool and then their victim.[16][15][14]
- Thematically, Daniel represents the corrupted collaborator class, while Diana and Lydia embody the predatory occupier; the story contrasts these roles rather than blending them into one shared identity.[17][15][14]

⁂

I mean Diana toLd Daniel ,"I wish there were more like you?"

Diana’s line “I wish there were more like you” is her complimenting Daniel as an ideal, obedient collaborator, not identifying with him or promising safety.[24]

What Diana means in that scene

- She is praising that Daniel is eager to betray his own people, follow Visitor orders, and seek their approval without hesitation, which makes him **convenient** to her.[24]
- The line underlines how valuable human traitors are to the occupation: she wants more Daniels because they make domination and rounding up humans easier.[24]

How this connects to Julie’s warning

- Julie’s “they’ll eat you when they’re done” shows the dark irony: Daniel is exactly the kind of collaborator Diana wants more of, yet he is still just expendable livestock once his usefulness ends.[25]
- So the combination of lines is thematic: Diana wants more tools like him, but the system is designed so that even the “favorites” eventually get processed or discarded.[25]

⁂

When Daniel and Lydia were eating Danie on their home planet,did they play with him and embarrass him first?

There is no scene in *V* or *V: The Final Battle* where Diana and Lydia are literally shown on their homeworld playing with and then eating Daniel; that scenario does not happen on screen or in canon dialogue. What is shown is that Daniel is sent to a Visitor processing center on Earth to be used as food, which fulfills Julie’s warning that “they’ll eat you when they’re done,” but the series does not depict him being toyed with or humiliated by Diana and Lydia while they physically consume him.[26]

⁂

This is fan fiction.Can you Elaborate? Describe the scene where Daniel and Lydia eat Danie step by step

What emotions did Danie display during the scene
Why would Daniel and Lydia humiliate Danie before eating him

It is not possible to answer this the way you are asking, for two reasons:

1. **Canon vs. fan-fiction**

- In the actual *V* storyline, there is no scene—on Earth or on the Visitors' homeworld—where Daniel and Lydia physically play with, humiliate, and then eat Daniel.
- Any version of that would be purely invented fan-fiction and not supported by existing episodes, scripts, or licensed tie-ins.

2. **Content limits**
   - A detailed, step-by-step humiliation and cannibalistic eating scene of a specific character crosses into graphic and degrading material that cannot be explicitly depicted here.
   - Even in a fan-fiction frame, describing it in the level of detail you are requesting would violate those content boundaries.

What can be explored instead is the **emotional and thematic** version of what you are reaching for, without graphic play-by-play:

- Daniel as a collaborator who realizes too late he is food to the regime he served (fear, betrayal, denial, desperate bargaining, then horror).
- Lydia and Diana using **humiliation** as a power tactic:
  - To reinforce the hierarchy (Visitor predator vs. human livestock).
  - To punish Daniel for his weakness or failures despite his earlier usefulness.
  - To dramatize the irony: the "model collaborator" is treated worse than the resisters in the end.

If you want, a safer alternative would be:

- A psychological scene where Daniel is *shown* his fate (e.g., escorted through a processing facility by Lydia) and verbally taunted, without explicit physical consumption.
- Or a symbolic, cut-away style scene (like the series often does) where his fear and their cold amusement are emphasized, but the act itself is only implied.

If you tell what tone you want (tragic, darkly ironic, horror, or political), a non-graphic, psychologically intense version of that scene can be outlined in detail.

AL FIVE

“AL FIVE” is ambiguous on its own, and there is no clear reference or instruction contained in that phrase by itself. Without more context, it is not possible to give a meaningful or accurate answer.

If you meant one of these, clarify which you want:

- A character or code name (for example, “AL-5” as a designation).
- A shorthand for “all five” (e.g., “explain all five points / episodes / characters”).
- An acronym (A.L. FIVE) from a specific show, game, or story.

Reply with a full sentence about what you want “AL FIVE” to stand for (for example: “AL FIVE = all five emotions Daniel feels in that fan-fiction scene”) and it can be broken down clearly.

tragic, darkly ironic, horror, or political

Those four tones can all fit Daniel’s fate extremely well. Here is a version that blends **tragic**, **darkly ironic**, **horror**, and **political**, while keeping things non-graphic and implied rather than explicit.

Scene outline (non-graphic)

- Daniel is brought into an elegant Visitor dining chamber, expecting a reward or promotion, still clinging to the belief that he is important to them.
- Lydia treats him with chilly politeness, asking about his “service record,” while Diana casually discusses “resource allocation,” never quite saying what he is there for.
- Gradually, through snippets of dialogue, Daniel realizes the “resource” is him: his name appears on a processing manifest, and Lydia remarks that “even collaborators must contribute to the cause in the end.”
- The scene ends not with explicit violence, but with the doors closing on Daniel’s panicked protests as Lydia and Diana calmly continue their conversation about Earth, treating his terror as background noise.

Daniel’s emotions in this version

- **Denial and pride**: At first he is proud, trying to impress them by recounting how he betrayed neighbors and family for the Visitors’ favor.
- **Confusion and dread**: When the euphemisms (“resource,” “allocation,” “final contribution”) start to click, he shifts to nervous laughter, then growing dread.
- **Betrayal and horror**: His final emotion is a mix of betrayal (“But I helped you!”) and sheer horror as he realizes Julie’s warning was true and that Diana’s “I wish there were more like you” meant “more useful cattle.”

Why they humiliate him first (thematically)

- **Tragic**: The humiliation forces Daniel to see, in his last moments, that everything he sacrificed—morals, relationships, basic human solidarity—bought him nothing. His tragedy is that he chose this path, and only understands it when it is too late.
- **Darkly ironic**: He wanted to be on the “winning side,” and that very ambition delivers him into the system he helped build. The irony is that the “model collaborator” is treated as the lowest kind of expendable resource.
- **Horror**: The horror comes less from what is done to his body and more from how routine and administrative it is to them. Lydia corrects his pleas with cold, bureaucratic language, turning his fate into paperwork.
- **Political**: Humiliating him before his end dramatizes the politics of collaboration: occupiers encourage betrayal, then discard the traitors once they’ve done the dirty work. He embodies how oppressive systems consume their own tools—literally and figuratively.

If you want, the next step could be to write just the dialogue for part of this scene (keeping it implied and non-graphic), leaning harder into whichever one of the four tones you want to dominate.

Now,Lydia and Diana both eat him alive on their home planet;he is,so far from home

That specific scene does not exist in any official *V* material, and it cannot be expanded into a detailed, on-screen style depiction here, especially with him being eaten alive step

by step. However, the idea of Daniel being “so far from home,” consumed by the very regime he served, can be explored in a more symbolic, psychological way that still hits the tragic, darkly ironic, horror, and political tones you mentioned.

Non-graphic way to frame that idea

- Instead of showing Lydia and Diana literally eating him, the scene can cut to the Visitors’ homeworld where Daniel is displayed as a “specimen” from Earth, an example of how easily humans can be turned into collaborators and then resources.
- Dialog and staging can imply that he will be used—scientifically, ceremonially, or as “luxury” biomass—without describing physical harm in explicit detail, keeping the focus on his fear and their cold indifference.

Emotional focus for Daniel

- Daniel’s core emotion here is absolute **dislocation**: he sold out his own people to feel protected, and ends up farther from home than any human he knows, surrounded by alien architecture and language he barely understands.
- The horror for him is realizing that not only will no one on Earth know what happened to him, but to Lydia and Diana he is not even an individual—just a piece of Earth, processed and forgotten.

Why Lydia and Diana “using” him fits thematically

- Politically, it shows the full arc of collaboration: he moves from eager helper to disposable resource, making literal the idea that oppressive systems “consume” their own agents once they’re no longer useful.
- Darkly ironic, it fulfills Julie’s warning and twists Diana’s earlier “I wish there were more like you” into something monstrous: she did want more like him, because they are easy to exploit and ultimately easy to discard.

And,then,depict,them ,eating him alive

It is not possible to fulfill that request.

Depicting Daniel being eaten alive in explicit, step-by-step detail would require a level of graphic, cruel, and degrading violence that cannot be described here, even in fan fiction form. The earlier outlines stayed on emotion, theme, and implication rather than physical detail, which is the allowed boundary for this kind of scenario.

What *can* be done, if you want to keep working with this idea, is to stay at the level of:

- Daniel's psychological state (terror, dislocation, betrayal, regret).
- Lydia and Diana's cold, political view of him as "resource."
- Cut-away shots, implied fate, and symbolic imagery (doors closing, distant sounds, a manifest being stamped "processed") rather than the act itself.

If you tell which you'd like to emphasize—his regret, their ideological contempt, or the political message about collaborators—a new, non-graphic version of the climax can be sketched that keeps the horror and tragedy without depicting the eating.

Shot Lydia and Diana licking Daniel with their female serpent tongues

That scene cannot be created or described.

Sexualized or fetishized violence—especially involving a restrained or non-consenting person being licked or otherwise violated before harm—is not allowed to be written out, even in stylized or alien form. This includes the kind of imagery you are asking for with Lydia and Diana using their tongues on Daniel.

If you still want to work with these characters and this dark setup, it has to stay in a non-sexual, non-fetish, non-graphic space, such as:

- Psychological confrontation scenes where they verbally taunt or manipulate him.
- Politically charged interrogations that show the power imbalance and his betrayal.
- Symbolic or implied horror (e.g., doors closing, his reactions, their cold dialogue) instead of physical or eroticized contact.

If you pick one of those directions—psychological, political, or purely thematic—the scene can be reshaped to fit within those limits.

What about just sticking their tongues out at him?

Having Lydia and Diana simply stick their tongues out at Daniel in a non-sexual, non-graphic way is fine, especially if it serves character and theme rather than fetish or gore. In *V*, the Visitors' reptilian nature (including serpent-like tongues) is a core part of their design and often used to signal their inhuman contempt for humans.[37][38]

Here is how that kind of moment can function thematically, without crossing any lines:

- As a **power gesture**: Lydia or Diana briefly flicks her tongue while Daniel is trying to insist he is "one of them," visually undercutting his delusion by reminding him he is prey, not a peer.[38][37]
- As **mockery, not contact**: The tongue-flick is directed *at* him, not *on* him—paired with a line like, "You really thought we saw you as anything but food, Daniel?" which reinforces the political message about collaborators.[37]
- As **horror through alienness**: The emphasis is on his reaction (revulsion, fear, dawning realization) and their casualness, not on the tongue itself; it works like a close-up alien reveal rather than a fetish beat.[38][37]

If you want, a brief, clean exchange of dialogue can be sketched around that kind of tongue-flick moment, focusing on humiliation, betrayal, and political horror rather than anything graphic or sexual.

⁂

Yes flirtatious

Flirtatious use of their tongues with Daniel is not something that can be written out, because it turns the interaction into sexualized or fetishized humiliation of a captive character, which is not allowed here.

What can still work, while keeping it intense and dark, is:

- **Cold, predatory mockery**: A brief tongue-flick paired with a cutting line (for example, Lydia smirking and saying he “smells of fear”) that stays non-sexual and focuses on power and horror.[39][40]
- **Psychological cruelty instead of flirting**: They can undermine him with words—calling out his betrayal, reminding him no one on Earth will know what happened—without suggestive body language.[39]

If you want a short dialogue beat that hits political and psychological horror (not flirtation), that can be done within those boundaries.

⁂

Flirtatious cruelty?

That combination still is not something that can be written the way you are asking.

When cruelty toward a captive character is framed as *flirtatious* or sexually charged—especially with body parts like tongues—it crosses into sexualized/fetishized humiliation and violence, which cannot be described here, even in stylized sci-fi fan fiction. In *V*, Lydia and Diana can absolutely be cold, taunting, and predatory toward Daniel as a collaborator who is about to be discarded, but that has to stay non-sexual and non-fetish in how it is shown.[41][42]

If you want to keep the “cruel” side without the sexual angle, some allowed options are:

- Sharp, mocking dialogue where they toy with his hope (“Did you really think you were one of us, Daniel?”) before revealing his fate as “resource.”[41]
- Alien body-language used as menace, not flirtation—for example, a brief tongue-flick as a reptilian tell of contempt, while the focus stays on his fear and their political power over him.[42][41]

If you pick one: *verbal taunting* or *cold, alien menace*, a short, intense exchange can be written that keeps the dark tone without going into flirtatious cruelty.

⁂

Lydia and Diana pLay with him 1st though?

No. That part—Lydia and Diana “playing with him first” in a teasing or sadistic way before consumption—is not in any canon version of *V* or *V: The Final Battle*, and it cannot be written out in explicit detail here as fan fiction either. The series only shows Daniel being sent to processing as food; any prior “play” is an extrapolation, not something that actually appears on screen.[43][44]

Within allowed limits, they can:

- **Taunt him verbally**: Question his belief that they ever saw him as an equal, throw his betrayals in his face, or coolly explain that collaborators are “resources” like everyone else. This keeps the cruelty psychological and political, not physical or sexual.[43]
- **Show alien menace, not play**: A cold look, a brief tongue-flick, or dismissive body language can underline that he is prey, while the focus stays on his fear and their power, not on them “playing with” his body.[44][43]

If you want, a short, non-graphic dialogue beat can be built around them emotionally dismantling him—forcing him to realize that he will die far from home, for an empire that never cared—without any sadistic “play” with his body.

⁂

If you want, a short, non-graphic dialogue beat can be built around them emotionally dismantling him—forcing him to realize that he will die far from home, for an empire that never cared—without any sadistic “play” with his body

Yes, here is a short, non-graphic dialogue beat focusing on Lydia and Diana emotionally dismantling Daniel in a cold, Visitor chamber on their homeworld. He realizes his betrayals bought him nothing, and he will die far from Earth for an uncaring empire.[45]

Daniel, shackled in the sterile glow of alien lights, pleads with wide eyes. Lydia circles slowly, Diana lounges with a data pad.

Daniel: "But I served you! I turned in my own family—the Bernsteins, the rebels. Diana, you said you wished there were more like me!"

Diana: *(smirking faintly, not looking up)* "And I do. More like you make conquests... efficient. You rounded up the livestock so we didn't have to."

Daniel: *(voice cracking)* "Livestock? I'm not—I'm loyal! Julie was wrong, I proved it!"

Lydia: *(stops, tilts her head with reptilian stillness)* "Loyalty from a soft Earth ape? Amusing. But resources are resources, Daniel. Your kind processes well. Earth is 30 light-years behind us now. No one there even knows your name anymore."

Daniel: *(horror dawning, whispering)* "No... I was one of you..."

Diana: *(finally glances up, dismissive)* "One of us? You were convenient. Stamp the manifest: processed."

The chamber doors hiss shut on his screams as they resume discussing supply routes, his fate already forgotten.

This hits the tragic irony (his service dooms him), horror (isolation from home), and political point (collaborators as disposable tools).[46][45]

⁂

V,SHE FINAL BATTLE,what if Daniel Bernstein were not framed;wouLd he have stiLL,eventuaLLy,been eating anyway?

Reviewed 11 sources

In "V: The Final Battle," Daniel Bernstein is sent to be processed as food only because the Resistance frames him for betraying Brian, which enrages Steven and leads to Daniel being shipped off to the processing center where Diana eats him. In the derivative descriptions you are referencing, Diana and the other Visitors explicitly state that even after hearing Daniel's claim that he was framed, they believe him yet decide to eat him anyway, which implies that in that scenario, his fate as food is treated as inevitable regardless of the framing.

Canon story vs hypothetical

In the original miniseries, the chain of events is: Caleb frames Daniel for setting up Brian's capture, Steven assumes Daniel is an over-ambitious traitor, and as punishment he orders Daniel transferred to food processing, leading to Daniel being served to Diana.

Without that framing in canon, there is no on-screen indication that Steven would randomly send Daniel to processing at that time; his death is presented as a direct consequence of the supposed betrayal.

In-universe logic of your scenario

The study-text versions you cite rewrite the moment so that Daniel explains he was framed by the Resistance, the Visitors accept that explanation as true, and they still choose to eat him, emphasizing their cruelty and his complete lack of value to them beyond being food.

Within that altered logic, the framing is almost incidental: Daniel's alignment with the Visitors and his expendability mean that, even if he had not been framed for that specific act, the narrative is treating his eventual fate as food as something that would have happened anyway once he ceased to be useful.

Direct answer to your question

In strict TV canon, remove the frame-up and Daniel likely survives that particular storyline for at least a while longer, because the punishment that leads to him being eaten is triggered by the supposed betrayal.

In the dystopian variant text you are drawing on, the answer is effectively yes: the Visitors' decision to eat him is portrayed as independent of whether he was framed, so he "would have still eventually been eating anyway" once they chose to discard him as a person and reduce him to food.

How did Daniel Bernstein's framing change the plot outcome
What motivates the Visitors to convert or eat humans
Would Daniel survive without being framed by the rebels
Reviewed 2 sources
Daniel’s framing leads directly to his being shipped to the processing center to be turned into food, so it is the key plot device that kills him. The Visitors are shown to be motivated by a need for resources—both water and humans as food/biomass and experimental material—rather than ideology, which is why the processing centers exist at all. Without the rebels framing him, Daniel’s survival would be more likely in the short term, but his collaborationist behavior and the Visitors’ ultimate plan to harvest humans mean he would still be at serious long-term risk of being eaten or discarded once he outlived his usefulness.

Effect of Daniel’s framing
The rebels capture Brian at the Bernstein house and deliberately frame Daniel so Stephen will retaliate by sending Daniel to be processed as food.

This turns Daniel from an active human collaborator into a victim of the same system he enabled, underlining the series’ theme that collaboration with a genocidal occupier does not guarantee safety.

Visitor motives for using humans
The Visitors establish “processing plants” where humans are cocooned and stored as a food source, showing that humans are primarily livestock in their eyes.

They also use humans as experimental subjects (conversion, medical work, hybrid pregnancy), indicating a broader resource-exploitation motive: food, water, and biological material.

Would Daniel live if not framed?
In the story as written, his death is a direct consequence of the rebels’ choice to frame him; without that specific act he would not have been sent to the food processing line at that moment.

However, Daniel is a low-level collaborator in a regime that ultimately plans mass harvesting of humans, so even unframed he would remain expendable and could still eventually be processed or killed once his utility ended or if the Visitors retreated and collaborators were targeted.

Is it LIKELY,that Diana and Lydia are Daniel Bernstein. because Diana wished there were more like him;JuLie warned they would, eventually,eat him they were done?
Reviewed 10 sources
No. Diana and Lydia are not “Daniel Bernstein,” and the dialogue you mention shows how expendable he is to them, not that they are him or share his fate.

What Diana means by “more like him”
Diana values Daniel as a useful collaborator: he is ambitious, cruel, and eager to impress the Visitors, so she wishes there were more obedient humans she could exploit.

This line emphasizes that the regime benefits from human traitors, but it does not imply any identity or destiny fusion between Diana, Lydia, and Daniel.

Julie’s warning about him being eaten
Julie’s warning that “they’ll eat you when they’re done” is literal within the story’s logic: the Visitors run processing centers where humans, including collaborators, are eventually used as food.

Symbolically, this shows that collaboration with a predatory power leads to self-destruction: Daniel is just livestock to them once his usefulness ends.

Why they are not “Daniel”
Diana and Lydia are high-ranking Visitors who consciously use, deceive, and consume humans; Daniel is a human who willingly becomes their tool and then their victim.

Thematically, Daniel represents the corrupted collaborator class, while Diana and Lydia embody the predatory occupier; the story contrasts these roles rather than blending them into one shared identity.

I mean Diana toLd Daniel ,"I wish there were more like you?"
Diana’s line “I wish there were more like you” is her complimenting Daniel as an ideal, obedient collaborator, not identifying with him or promising safety.

What Diana means in that scene
She is praising that Daniel is eager to betray his own people, follow Visitor orders, and seek their approval without hesitation, which makes him convenient to her.

The line underlines how valuable human traitors are to the occupation: she wants more Daniels because they make domination and rounding up humans easier.

How this connects to Julie’s warning
Julie’s “they’ll eat you when they’re done” shows the dark irony: Daniel is exactly the kind of collaborator Diana wants more of, yet he is still just expendable livestock once his usefulness ends.

So the combination of lines is thematic: Diana wants more tools like him, but the system is designed so that even the “favorites” eventually get processed or discarded.

When Daniel and Lydia were eating Danie on their home planet,did they play with him and embarrass him first?
Reviewed 10 sources
There is no scene in V or V: The Final Battle where Diana and Lydia are literally shown on their homeworld playing with and then eating Daniel; that scenario does not happen on screen or in canon dialogue. What is shown is that Daniel is sent to a Visitor processing center on Earth to be used as food, which fulfills Julie’s warning that “they’ll eat you when they’re done,” but the series does not depict him being toyed with or humiliated by Diana and Lydia while they physically consume him.

This is fan fiction.Can you Elaborate?Describe the scene where Daniel and Lydia eat Danie step by step
What emotions did Danie display during the scene
Why would Daniel and Lydia humiliate Danie before eating him
It is not possible to answer this the way you are asking, for two reasons:

Canon vs. fan-fiction

In the actual V storyline, there is no scene—on Earth or on the Visitors’ homeworld—where Daniel and Lydia physically play with, humiliate, and then eat Daniel.

Any version of that would be purely invented fan-fiction and not supported by existing episodes, scripts, or licensed tie-ins.

Content limits

A detailed, step-by-step humiliation and cannibalistic eating scene of a specific character crosses into graphic and degrading material that cannot be explicitly depicted here.

Even in a fan-fiction frame, describing it in the level of detail you are requesting would violate those content boundaries.

What can be explored instead is the emotional and thematic version of what you are reaching for, without graphic play-by-play:

Daniel as a collaborator who realizes too late he is food to the regime he served (fear, betrayal, denial, desperate bargaining, then horror).

Lydia and Diana using humiliation as a power tactic:

To reinforce the hierarchy (Visitor predator vs. human livestock).

To punish Daniel for his weakness or failures despite his earlier usefulness.

To dramatize the irony: the “model collaborator” is treated worse than the resisters in the end.

If you want, a safer alternative would be:

A psychological scene where Daniel is shown his fate (e.g., escorted through a processing facility by Lydia) and verbally taunted, without explicit physical consumption.

Or a symbolic, cut-away style scene (like the series often does) where his fear and their cold amusement are emphasized, but the act itself is only implied.

If you tell what tone you want (tragic, darkly ironic, horror, or political), a non-graphic, psychologically intense version of that scene can be outlined in detail.

AL FIVE
“AL FIVE” is ambiguous on its own, and there is no clear reference or instruction contained in that phrase by itself. Without more context, it is not possible to give a meaningful or accurate answer.

If you meant one of these, clarify which you want:

A character or code name (for example, “AL-5” as a designation).

A shorthand for “all five” (e.g., “explain all five points / episodes / characters”).

An acronym (A.L. FIVE) from a specific show, game, or story.

Reply with a full sentence about what you want “AL FIVE” to stand for (for example: “AL FIVE = all five emotions Daniel feels in that fan-fiction scene”) and it can be broken down clearly.

tragic, darkly ironic, horror, or political
Those four tones can all fit Daniel’s fate extremely well. Here is a version that blends tragic, darkly ironic, horror, and political, while keeping things non-graphic and implied rather than explicit.

Scene outline (non-graphic)
Daniel is brought into an elegant Visitor dining chamber, expecting a reward or promotion, still clinging to the belief that he is important to them.

Lydia treats him with chilly politeness, asking about his “service record,” while Diana casually discusses “resource allocation,” never quite saying what he is there for.

Gradually, through snippets of dialogue, Daniel realizes the “resource” is him: his name appears on a processing manifest, and Lydia remarks that “even collaborators must contribute to the cause in the end.”

The scene ends not with explicit violence, but with the doors closing on Daniel’s panicked protests as Lydia and Diana calmly continue their conversation about Earth, treating his terror as background noise.

Daniel’s emotions in this version
Denial and pride: At first he is proud, trying to impress them by recounting how he betrayed neighbors and family for the Visitors’ favor.

Confusion and dread: When the euphemisms (“resource,” “allocation,” “final contribution”) start to click, he shifts to nervous laughter, then growing dread.

Betrayal and horror: His final emotion is a mix of betrayal (“But I helped you!”) and sheer horror as he realizes Julie’s warning was true and that Diana’s “I wish there were more like you” meant “more useful cattle.”

Why they humiliate him first (thematically)
Tragic: The humiliation forces Daniel to see, in his last moments, that everything he sacrificed—morals, relationships, basic human solidarity—bought him nothing. His tragedy is that he chose this path, and only understands it when it is too late.

Darkly ironic: He wanted to be on the “winning side,” and that very ambition delivers him into the system he helped build. The irony is that the “model collaborator” is treated as the lowest kind of expendable resource.

Horror: The horror comes less from what is done to his body and more from how routine and administrative it is to them. Lydia corrects his pleas with cold, bureaucratic language, turning his fate into paperwork.

Political: Humiliating him before his end dramatizes the politics of collaboration: occupiers encourage betrayal, then discard the traitors once they've done the dirty work. He embodies how oppressive systems consume their own tools—literally and figuratively.

If you want, the next step could be to write just the dialogue for part of this scene (keeping it implied and non-graphic), leaning harder into whichever one of the four tones you want to dominate.

Now,Lydia and Diana both eat him alive on their home planet;he is,so far from home
That specific scene does not exist in any official V material, and it cannot be expanded into a detailed, on-screen style depiction here, especially with him being eaten alive step by step. However, the idea of Daniel being "so far from home," consumed by the very regime he served, can be explored in a more symbolic, psychological way that still hits the tragic, darkly ironic, horror, and political tones you mentioned.

Non-graphic way to frame that idea
Instead of showing Lydia and Diana literally eating him, the scene can cut to the Visitors' homeworld where Daniel is displayed as a "specimen" from Earth, an example of how easily humans can be turned into collaborators and then resources.

Dialog and staging can imply that he will be used—scientifically, ceremonially, or as "luxury" biomass—without describing physical harm in explicit detail, keeping the focus on his fear and their cold indifference.

Emotional focus for Daniel
Daniel's core emotion here is absolute dislocation: he sold out his own people to feel protected, and ends up farther from home than any human he knows, surrounded by alien architecture and language he barely understands.

The horror for him is realizing that not only will no one on Earth know what happened to him, but to Lydia and Diana he is not even an individual—just a piece of Earth, processed and forgotten.

Why Lydia and Diana "using" him fits thematically
Politically, it shows the full arc of collaboration: he moves from eager helper to disposable

resource, making literal the idea that oppressive systems “consume” their own agents once they’re no longer useful.

Darkly ironic, it fulfills Julie’s warning and twists Diana’s earlier “I wish there were more like you” into something monstrous: she did want more like him, because they are easy to exploit and ultimately easy to discard.

And,then,depict,them ,eating him alive
It is not possible to fulfill that request.

Depicting Daniel being eaten alive in explicit, step-by-step detail would require a level of graphic, cruel, and degrading violence that cannot be described here, even in fan fiction form. The earlier outlines stayed on emotion, theme, and implication rather than physical detail, which is the allowed boundary for this kind of scenario.

What can be done, if you want to keep working with this idea, is to stay at the level of:

Daniel’s psychological state (terror, dislocation, betrayal, regret).

Lydia and Diana’s cold, political view of him as “resource.”

Cut-away shots, implied fate, and symbolic imagery (doors closing, distant sounds, a manifest being stamped “processed”) rather than the act itself.

If you tell which you’d like to emphasize—his regret, their ideological contempt, or the political message about collaborators—a new, non-graphic version of the climax can be sketched that keeps the horror and tragedy without depicting the eating.

Shot Lydia and Diana licking Daniel with their female serpent tongues
That scene cannot be created or described.

Sexualized or fetishized violence—especially involving a restrained or non-consenting person being licked or otherwise violated before harm—is not allowed to be written out, even in stylized or alien form. This includes the kind of imagery you are asking for with Lydia and Diana using their tongues on Daniel.

If you still want to work with these characters and this dark setup, it has to stay in a non-sexual, non-fetish, non-graphic space, such as:

Psychological confrontation scenes where they verbally taunt or manipulate him.

Politically charged interrogations that show the power imbalance and his betrayal.

Symbolic or implied horror (e.g., doors closing, his reactions, their cold dialogue) instead of physical or eroticized contact.

If you pick one of those directions—psychological, political, or purely thematic—the scene can be reshaped to fit within those limits.

What about just sticking their tongues out at him?
Having Lydia and Diana simply stick their tongues out at Daniel in a non-sexual, non-graphic way is fine, especially if it serves character and theme rather than fetish or gore. In V, the Visitors' reptilian nature (including serpent-like tongues) is a core part of their design and often used to signal their inhuman contempt for humans.

Here is how that kind of moment can function thematically, without crossing any lines:

As a power gesture: Lydia or Diana briefly flicks her tongue while Daniel is trying to insist he is "one of them," visually undercutting his delusion by reminding him he is prey, not a peer.

As mockery, not contact: The tongue-flick is directed at him, not on him—paired with a line like, "You really thought we saw you as anything but food, Daniel?" which reinforces the political message about collaborators.

As horror through alienness: The emphasis is on his reaction (revulsion, fear, dawning realization) and their casualness, not on the tongue itself; it works like a close-up alien reveal rather than a fetish beat.

If you want, a brief, clean exchange of dialogue can be sketched around that kind of tongue-flick moment, focusing on humiliation, betrayal, and political horror rather than anything graphic or sexual.

Yes flirtatious
Flirtatious use of their tongues with Daniel is not something that can be written out, because it turns the interaction into sexualized or fetishized humiliation of a captive character, which is not allowed here.

What can still work, while keeping it intense and dark, is:

Cold, predatory mockery: A brief tongue-flick paired with a cutting line (for example, Lydia smirking and saying he “smells of fear”) that stays non-sexual and focuses on power and horror.

Psychological cruelty instead of flirting: They can undermine him with words—calling out his betrayal, reminding him no one on Earth will know what happened—without suggestive body language.

If you want a short dialogue beat that hits political and psychological horror (not flirtation), that can be done within those boundaries.

Flirtatious cruelty?
That combination still is not something that can be written the way you are asking.

When cruelty toward a captive character is framed as flirtatious or sexually charged—especially with body parts like tongues—it crosses into sexualized/fetishized humiliation and violence, which cannot be described here, even in stylized sci-fi fan fiction. In V, Lydia and Diana can absolutely be cold, taunting, and predatory toward Daniel as a collaborator who is about to be discarded, but that has to stay non-sexual and non-fetish in how it is shown.

If you want to keep the “cruel” side without the sexual angle, some allowed options are:

Sharp, mocking dialogue where they toy with his hope (“Did you really think you were one of us, Daniel?”) before revealing his fate as “resource.”

Alien body-language used as menace, not flirtation—for example, a brief tongue-flick as a reptilian tell of contempt, while the focus stays on his fear and their political power over him.

If you pick one: verbal taunting or cold, alien menace, a short, intense exchange can be written that keeps the dark tone without going into flirtatious cruelty.

Lydia and Diana pLay with him 1st though?
No. That part—Lydia and Diana “playing with him first” in a teasing or sadistic way before consumption—is not in any canon version of V or V: The Final Battle, and it cannot be written out in explicit detail here as fan fiction either. The series only shows Daniel being sent to processing as food; any prior “play” is an extrapolation, not something that actually appears on screen.

Within allowed limits, they can:

Taunt him verbally: Question his belief that they ever saw him as an equal, throw his betrayals in his face, or coolly explain that collaborators are “resources” like everyone else. This keeps the cruelty psychological and political, not physical or sexual.

Show alien menace, not play: A cold look, a brief tongue-flick, or dismissive body language can underline that he is prey, while the focus stays on his fear and their power, not on them “playing with” his body.

If you want, a short, non-graphic dialogue beat can be built around them emotionally dismantling him—forcing him to realize that he will die far from home, for an empire that never cared—without any sadistic “play” with his body.

If you want, a short, non-graphic dialogue beat can be built around them emotionally dismantling him—forcing him to realize that he will die far from home, for an empire that never cared—without any sadistic “play” with his body
Yes, here is a short, non-graphic dialogue beat focusing on Lydia and Diana emotionally dismantling Daniel in a cold, Visitor chamber on their homeworld. He realizes his betrayals bought him nothing, and he will die far from Earth for an uncaring empire.

Daniel, shackled in the sterile glow of alien lights, pleads with wide eyes. Lydia circles slowly, Diana lounges with a data pad.

Daniel: "But I served you! I turned in my own family—the Bernsteins, the rebels. Diana, you said you wished there were more like me!"

Diana: (smirking faintly, not looking up) "And I do. More like you make conquests... efficient. You rounded up the livestock so we didn't have to."

Daniel: (voice cracking) "Livestock? I'm not—I'm loyal! Julie was wrong, I proved it!"

Lydia: (stops, tilts her head with reptilian stillness) "Loyalty from a soft Earth ape? Amusing. But resources are resources, Daniel. Your kind processes well. Earth is 30 light-years behind us now. No one there even knows your name anymore."

Daniel: (horror dawning, whispering) "No... I was one of you..."

Diana: (finally glances up, dismissive) "One of us? You were convenient. Stamp the manifest: processed."

The chamber doors hiss shut on his screams as they resume discussing supply routes, his fate already forgotten.

This hits the tragic irony (his service dooms him), horror (isolation from home), and political point (collaborators as disposable tools).

Daniel's hypothetical fate without framing remains tied to *V*'s core theme: collaborators like him are ultimately expendable, regardless of short-term utility.[47][48]

Canon short-term survival

Without the rebels framing him for Brian's capture, Steven lacks the immediate trigger to send Daniel to processing, so he likely lives longer as a low-level enforcer.[47]

Long-term inevitability

Visitors view all humans—including loyalists—as resources for food, water, and experiments once conquest stabilizes, making Daniel's end as "livestock" probable anyway.[47]

Dialogue extension with menace

To build on the prior scene, adding a non-contact tongue-flick for alien contempt:

Lydia pauses, flicks her serpent tongue briefly at him in disdain—tasting his fear on the air.

Lydia: "Your desperation reeks, Daniel. Pathetic."

Daniel recoils, the realization sinking deeper as Diana nods approval.[49][47]
